

BUILT ON EXPERIENCE. FOCUSED ON EXECUTION.

Gas utility projects require more than securing an easement. They require careful planning, clear communication, disciplined land management, and continuity from the first property conversation through construction and restoration.

■ WHAT WE HANDLE

- ✓ Project management & administration
- ✓ Title & ownership
- ✓ Right of way acquisition
- ✓ Construction support
- ✓ Routing & siting support
- ✓ Survey & field support
- ✓ Nonenvironmental permitting
- ✓ Project closeout

■ HOW WE WORK

01 Start prepared
Understand the corridor before engagement begins.

02 Communicate early
Keep the project and the property owner informed.

03 Stay accountable
Every tract has a next action.

04 Carry commitments through construction
What is agreed to matters.

ENERGY-LAND EXPERTISE

HOW WE KEEP YOUR PROJECT ON SCHEDULE.

■ KUDU • YOUR PROJECT RECORD

Real time project intelligence. Better decisions. Lower risk.

Kudu is Dudley's proprietary land management platform, providing a current and organized view of property activity throughout the project.

Real time project visibility

Acquisition activity, property status, commitments, and identified risks.

One current property record

Ownership, tract information, easement requirements, and acquisition status.

Project mapping

Property status and project progress, viewed geographically.

Document control

Title, survey, acquisition, and restoration documents, organized.

One land approach, scaled to the work

Gas transmission and distribution projects may look different in the field, but both depend on organized land information, effective stakeholder communication, and disciplined execution.
