DUDLEY
UTILITY SERVICES

BRAND & DESIGN SYSTEM · V3.0

# THE ROUTE AND THE GRID

Every DUS asset is a corridor drawn across land: survey-grid precision, one green right-of-way line, squared structure, teal depth. This book is the source of truth for how that looks.

DUDLEY UTILITY SERVICES · BRAND SYSTEM

MAINTAINED WITH THE DEMANDCAST TEAM · SEPTEMBER 2026

LOGO

# The wordmark is artwork.

A custom condensed logotype, delivered as files. It is placed, never re-typed, never restyled. Black and DUS Teal on light grounds; all white on dark.

PRIMARY · LIGHT GROUNDS — DUS-LOGO.PNG

REVERSED · DARK GROUNDS — DUS-LOGO-WHITE.PNG

CLEAR SPACE

- Clear space on all sides equals half the wordmark height. Nothing enters it.
- Minimum width: 120px on screen, 1.1″ in print.
- Scale proportionally, from the corner, every time.
- On photography, place only over calm, dark, low-detail areas.

× DON'T STRETCH

× DON'T RECOLOR

× DON'T LOSE CONTRAST

× DON'T RE-TYPE IT

COLOR

# Teal leads. Green earns its place.

DUS Teal is what separates Utility Services from Dudley Land Company. Green is inherited from the parent brand and spent like a scarce resource: markers, rules, the route.

### DUS Teal

#015270

`--teal-500`

The primary. Fields, headlines on white, table headers, links.

### Dudley Green

#41BE48

`--green-500`

The accent. Checks, rules, markers, the route line. Never a fill.

**Ink**
#2B2B2B
`--ink-800`

Primary text. Deep grounds use the field gradients, not flat black.

**White**
#FFFFFF
`--white`

The default ground. Whitespace is a brand asset.

TEAL RAMP

950 800 700 500 400 300 100 050

GREEN RAMP

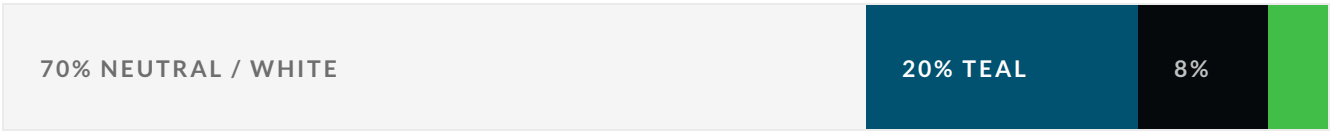

700 600 500 400 100

NEUTRALS

950 800 600 500 400 300 200 100 FFF

PROPORTIONS ON A TYPICAL ASSET

INK GREEN

- Green stays under ~8% of any composition. If it reads green, cut some.
- Green is never body text below 20px, except on ink grounds.
- Dark fields are always the teal or ink gradients, never flat #000.

TYPOGRAPHY

# Lato. Three weights. No exceptions.

Black carries the brand, Bold labels it, Regular explains it. Display headlines run uppercase; everything else is sentence case.

# DELIVERING ENERGY

**Display**

Covers, title slides, banners. Short and declarative, four words or fewer.

900 · UPPERCASE · -0.02EM · LH 0.98

# Know your costs upfront

**Headline / H1**

Social headlines and page titles. Sentence case.

900 · -0.022EM · LH 1.06

# Right-of-way, done right the first time

**H2**

Slide titles and document section heads.

900 · -0.018EM · LH 1.12

## Siting, routing, and easement acquisition

**H3 / Label**

Subheads, card titles, list items.

700 · -0.008EM · LH 1.22

---

We know the counties, the courthouses, and the people who make deals happen. Every claim is backed by real project data: real timelines, actual budgets, measurable outcomes.

**Body**

Plain, confident, short sentences.

400 · 16–17PX · LH 1.6

---

TRANSMISSION & RIGHT-OF-WAY

**Eyebrow**

Section markers, always with the green survey square.

700 · 13PX · 0.16EM · UPPERCASE

---

DUDLEY UTILITY SERVICES · 01 / 04

**Micro label**

Plat-sheet metadata: counters, footers, annotations.

700 · 11PX · 0.22EM · UPPERCASE

---

- The DUDLEY wordmark is not set in Lato and is never reproduced with type. See the logo rules above.

SPACING

# Every gap is a decision.

A 4px-base scale with 11 steps. Use the tokens for all margin, padding, and gap values. No magic numbers, no ad-hoc tweaking.

| | | |
|---|---|---|
| `--sp-1` | 4 px |  Micro: icon nudge, inline offset |
| `--sp-2` | 8 px |  Tight: stat value-to-label, tight list gap |
| `--sp-3` | 12 px |  Compact: list item gap, small card inner |
| `--sp-4` | 16 px |  Small: eyebrow-to-heading, heading-to-body, card content gaps |
| `--sp-5` | 20 px |  Standard: paragraph spacing, form field gap |
| `--sp-6` | 24 px |  Medium: card padding, component gaps, grid gap |
| `--sp-8` | 32 px |  Large: between content groups, body-to-CTA |
| `--sp-10` | 40 px |  Generous: subsection breaks |
| `--sp-12` | 48 px |  Container: horizontal wrap padding |
| `--sp-16` | 64 px |  Section-head to content block |
| `--sp-20` | 80 px |  Section: vertical section padding (top/bottom) |

## TEXT-FLOW PRESETS

TRANSMISSION & RIGHT-OF-WAY

`--sp-4 · 16px`

# Know your costs before the first boot hits the ground.

`--sp-4 · 16px`

We price by the parcel, not by the hour. You see the full scope, the full cost, and the full timeline before you commit.

`--sp-8 · 32px`

Get a scope estimate

Eyebrow → Heading: `--text-eyebrow-to-heading` (16px) · Heading → Body: `--text-heading-to-body` (16px) · Body → CTA: `--text-body-to-cta` (32px)

## RULES

### Always use the token

Never write a raw pixel value for spacing. Use `var(--sp-6)`, not `24px`. This keeps the system adjustable and consistent.

### Text flow is locked

Eyebrow-to-heading and heading-to-body are always `--sp-4` (16px). Body-to-CTA is always `--sp-8` (32px). No exceptions.

### Stay on the scale

If you need a value between steps, pick the nearer step. No 18px, 22px, 26px, 30px, 36px, 44px, or 58px. Those are the old chaos.

### Section rhythm

`--sp-20` (80px) between sections. `--sp-16` (64px) from section heading to content. `--sp-12` (48px) for container horizontal padding.

ICONS

# Outlined, gradient-stroked, surveyor-precise.

Every icon is a Remix Icon outline with the DUS teal-to-green gradient as its stroke. Three sizes on the 4px grid. Squared containers only.

## RULES

### Source and style

Remix Icon ( `remixicon.com` ), always the `-line` suffix variant. Outlined only, never filled or solid.

### Stroke

`stroke-width="1.2"` with `stroke-linecap="round"` and `stroke-linejoin="round"` . Simple geometric paths, no fills.

### Color

DUS gradient teal-to-green via SVG `<linearGradient>` , horizontal left to right. Never flat single-color icons.

### Containers

Squared with `--r-md` (6px). Never circles, never `border-radius: 50%` . Coverage badges use solid teal or green backgrounds with white stroke.

## SIZE SCALE

`--icon-sm` 24px

`--icon-md` 40px

`--icon-lg` 48px

## CANONICAL GRADIENT DEFINITION

Place this `<defs>` block once per page. All icons reference these gradients via `url(#dus-grad)` .

```
<svg width="0" height="0" aria-hidden="true" style="position:absolute">
  <defs>
    <linearGradient id="dus-grad"
      x1="0" y1="12" x2="24" y2="12"
      gradientUnits="userSpaceOnUse">
      <stop stop-color="#015270"/>
      <stop offset="1" stop-color="#41BE48"/>
    </linearGradient>
    <linearGradient id="dus-grad-40"
      x1="0" y1="20" x2="40" y2="20"
      gradientUnits="userSpaceOnUse">
      <stop stop-color="#015270"/>
      <stop offset="1" stop-color="#41BE48"/>
    </linearGradient>
  </defs>
</svg>
```

## USAGE PATTERN

Two steps: define the gradient once per page, then use the `.dus-icon` class with SVGs that reference `url(#dus-grad)`.

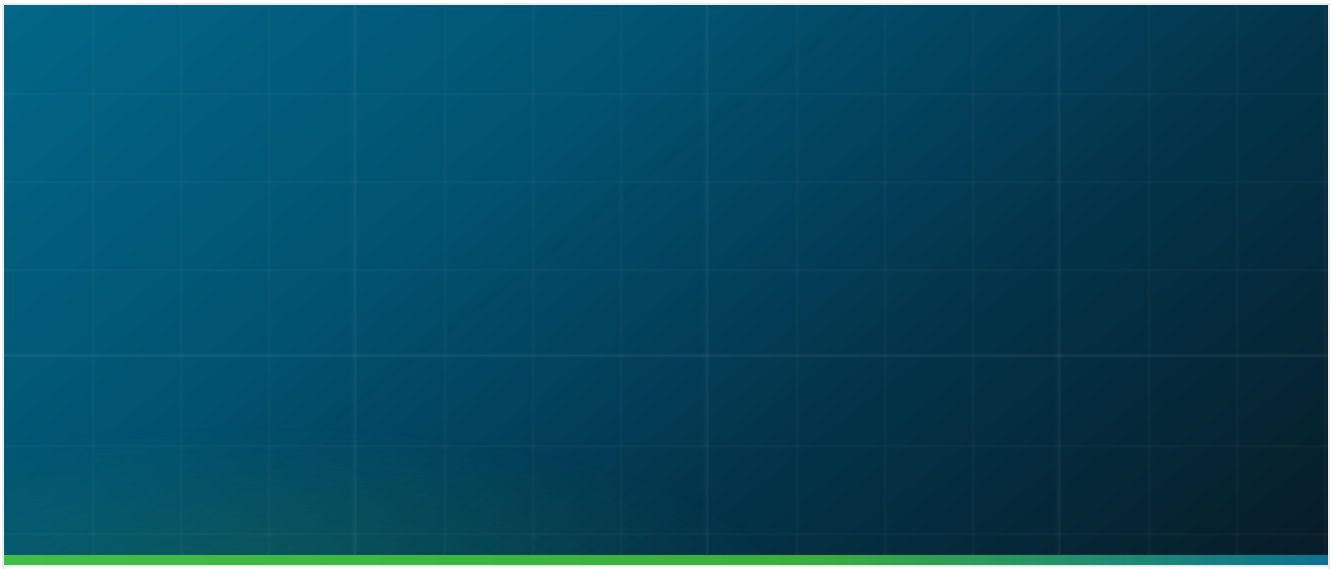

```
<!-- Step 1: gradient defs (once per page) -->
<svg width="0" height="0" aria-hidden="true" style="position:absolute">
  <defs>
    <linearGradient id="dus-grad" x1="0" y1="12" x2="24" y2="12"
      gradientUnits="userSpaceOnUse">
      <stop stop-color="#015270"/>
      <stop offset="1" stop-color="#41BE48"/>
    </linearGradient>
  </defs>
</svg>

<!-- Step 2: use in a card -->
<div class="dus-icon dus-icon--md">
  <svg viewBox="0 0 24 24" fill="none">
    <path d="..." stroke="url(#dus-grad)"
      stroke-width="1.2" stroke-linecap="round"
      stroke-linejoin="round"/>
  </svg>
</div>
```

MOTIFS

# Four moves make it DUS.

The survey grid, the route line, the horizon rule, and the corner ticks. Each is drawn from the work itself: plat maps, corridors, section lines.

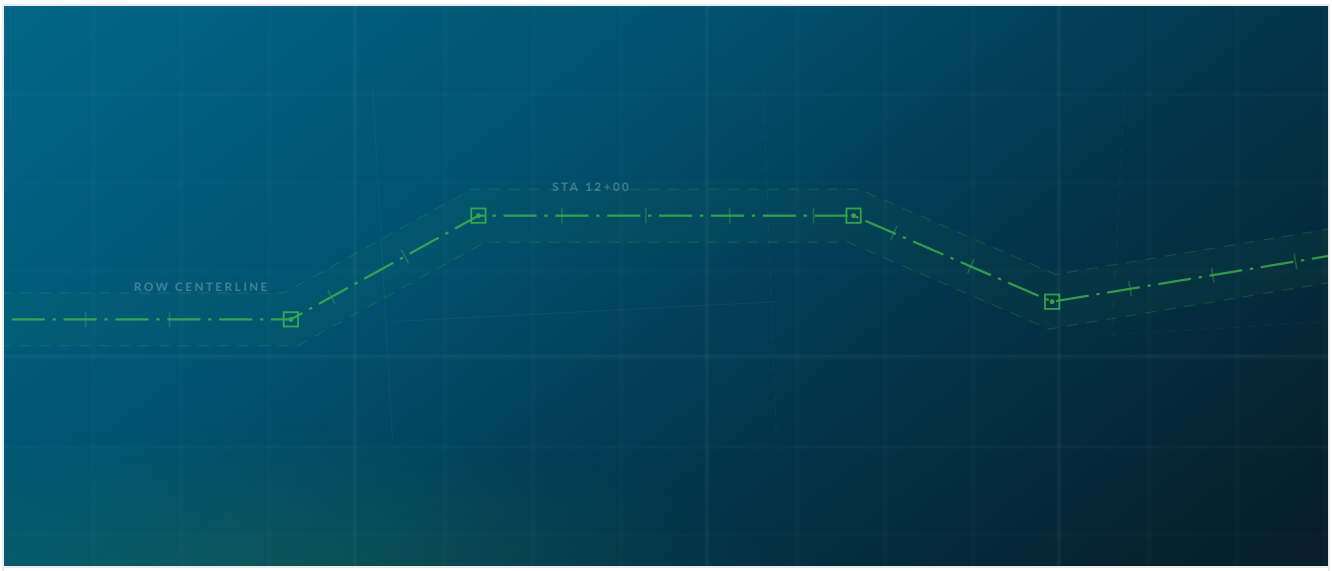

SURVEY GRID · DARK

Every dark field carries the plat grid: fine 44px cells, a heavier section line every fourth. The green horizon anchors the bottom edge.

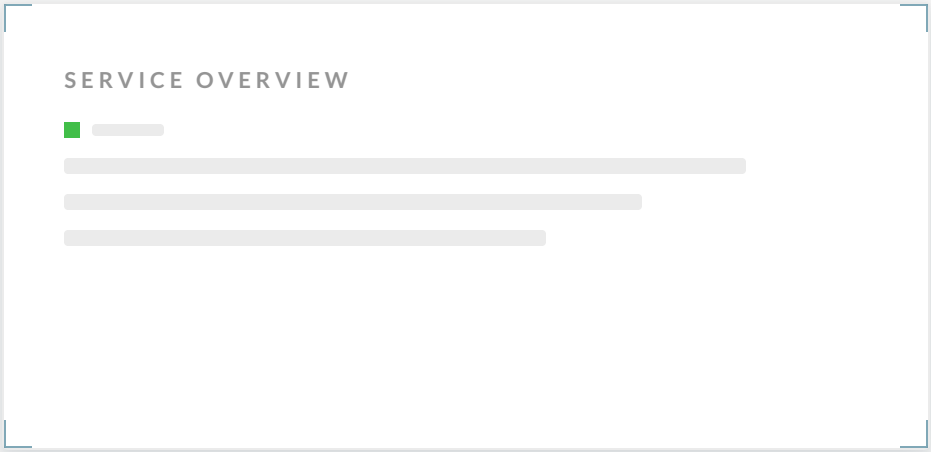

### SURVEY GRID · LIGHT

On white it is a whisper, not a pattern. If you notice it before the content, it is too strong.

### ROUTE LINE

Drawn like an alignment sheet: dash-dot centerline, easement corridor, PI monuments, station ticks, parcel lines. One per composition, behind content, never through body text.

### CORNER TICKS

Plat-sheet corners frame the body of print documents. Quiet, structural, surveyor-precise.

COMPONENTS

# 24 reusable parts, staged where they live.

Dark-surface components stay on dark. Light-surface components stay on light. Each file is self-contained HTML with an AI-readable comment header.
